About Us 

Artery Health aims at applying the globally surfacing multifaceted perspectives in the field of health.

To live a life that is simultaneously so impeccable in quality and well-balanced in health, the environment in which a human resides must stay clean, pure, and healthy. Artery Health is opening up a vast space of remarkable possibilities.

Artery Health finds alternatives to the limitations of our existing health sector. One of the main objectives of Artery Health is to provide affordable highest quality healthcare services in no time. We bring you a state of the art healthcare system that changes the relationship between healthcare workers and ill-health people, a system that offers the maximum feasible hospital facilities at every doorstep, and a system that flourishes the lives of people with the aid of advanced technology and scientific methods.

Doc2Door

Medical professionals visit patients at their homes to provide medical care, including diagnosis, treatment, and follow up care. This service ensures convenience and personalized care for individuals who may have difficulty visiting healthcare facilities.

Face to Face

In-person appointments with doctors at Artery Point, a dedicated facility where patients can receive comprehensive medical consultations, clinical examinations, and follow-up care. This service provides a comfortable and accessible setting for patients to address their healthcare needs.

E-Doc

An online platform that offers audio and video call facilities to connect patients with doctors virtually. E-Doc provides a convenient and efficient way for individuals to seek medical advice, discuss symptoms, receive prescriptions, and access healthcare consultations through online platform.

Medfile

Specialist doctors offer expert opinion on Medical reports and prescriptions through online platforms. Medfile provides patients with the opportunity to seek guidance, clarification, and personalized advice from healthcare professionals based on their test results and prescribed medications.

Calorie Café

A café that specializes in offering healthy and nutritious food options to promote better health. Calorie Cafe focuses on providing balanced meals, emphasizing whole foods and mindful eating, helping individuals make healthier choices for their overall well-being.

Eduhealth

Artery Health's medical and health education programs are specifically designed for students. Eduhealth aims to empower young individuals with essential knowledge about health, wellness, disease prevention, and healthy lifestyle habits, fostering a culture of well-being from an early age.

Medship

A service that facilitates the delivery of prescribed medicines, medical equipment, and pharmaceutical products directly to patients' homes. Medship ensures the timely and reliable provision of necessary medical supplies, enhancing convenience and accessibility for patients.

Quicklab

This service provides lab support by collecting samples at patients' homes and delivering the reports within a specified time frame. Quicklab aims to streamline the diagnostic process and ensure efficient testing and reporting, making it convenient for individuals to undergo necessary medical tests, without going out of their home

Artery Medical Research

Artery Medical Research involves the scientific investigation of health-related topics, aiming to advance knowledge and understanding of human health and diseases. It plays a crucial role in improving healthcare practices and patient outcomes, contributing to the advancement of medical knowledge and the development of innovative approaches to healthcare.

Desired Outcome

This is the era 'in which' the concept of sustainable development gained the most relevance. Among the 17 Sustainable Development Goals that are put forward with the aim of bringing the best health, quality life and clean environment, the important goals 3, 6, 8, 11 and 15 are Good health and wellbeing, Clean Water and Sanitation, Decent Work and Economic Growth, Sustainable Cities and Communities, Life On Land. Artery health concept brings longitudinal collaboration in holistic practical approaches for attaining aforesaid goals and bringing a better human life.

One Health

One Health is a collaborative, multi sectoral, and transdisciplinary approach working at the local, regional, national, and global levels with the goal of achieving optimal health outcomes recognizing the interconnection between people, animals, plants, and their shared environment. Artery becomes the practical embodiment of this idea.
